

# Activities to Date

***Updated June 13, 2023***

Our projects range from very large and complex such as replacement of the Education Wing windows, to smaller items such as replacing outdated circuit breaker panels. Just like in your home, things sometimes fail unexpectedly and we are faced with an unplanned repair, causing our priorities to shift. With two buildings over 100 years old, and one approaching 70 years old, there is a great deal of maintenance, repair and modernization needed.

Thus far in 2023, the PSC has:

- Established Goals for 2023
- Continued work on Capital Improvement planning
- Continued supervising finishing touches on the Community Outreach Center
- Begun a Space Usage Policy
- Arranged decommissioning of the non-functional 1040 Narthex elevator
- Is pursuing a grant from the Fund for Sacred Spaces for accessibility in 1050.
- Researched, discussed approved a beekeeping project proposed by the Community Garden, to benefit the DCC, Grocery Bag Ministry and other food programs. An independent manager will service the hives in return for one-half the output.
- Reviewed a proposal to proceed with a Columbarium at the Church, including background, design, and financing. The Committee endorsed recommending approval by the Governance Board.
- Approved a proposal to stripe and seal the parking lot, and turning the 1050 entrance into two-way traffic.
- Continued work with Bero and Catenary Masonry on a plan to address roof repairs to the Sanctuary and the Education Wing.
- Approved a plan to add key fob access to 1040 and 1050, including remote access for the daycare door.
- Started review of a budget from the Technology Committee for the next 36 months.
- Submitted a grant for a portion of the cost to repair the foundation of 1050 to the Rochester Community Foundation.
- Continued work on a strategy to replace Education Wing windows.
